PERSONAL PROJECTS

Weather app

- It's a cool React Weather App, Where you can find the weather of your/others city. I was building this app using npm-styled-component and the help of open-weather API.

leave management system

- Creating the website's User Interface (UI) using HTML, CSS and React. Leave Management System is a web application for managing employee leaves.

Personal-Blog-Website

- A multi-page website built using HTML and CSS skills which includes custom images, layout, and styling. Along with the webpage design considerations, I worked to appropriately structure the files, as well as use proper formatting & style.
